

JUSTINE P. FERNANDO

Full-Stack Web Developer / .NET Developer

City of San Pedro, Laguna, 4023, Philippines | +639621983021 | jfpapasin@gmail.com

WORK EXPERIENCE

SOFTWARE DEVELOPER

Systems and Software Consulting Group, Inc.

June 2023 - Present

Makati City, Philippines

- Worked on different home-grown products and internal projects using a multitude of programming languages as a full-stack software developer, providing software development support and maintenance in a fast-paced, highly competitive environment, while also providing consultation and assistance when necessary.
- Maintained both in-house and on-site client communication for system support, progress development and general assistance, while also keeping client-to-company confidentiality and privacy.
- Currently serving as lead technical developer for a project involving the systematic overhaul of one of the company's home-grown products using .NET Core and React, serving as resource person for the creation of standardization of procedures and technical team management.
- Awarded Employee of the Year for the year of 2024.

FULL-STACK WEB DEVELOPER

Freelance

March 2024 - Present

- Worked as a full-stack web developer regarding ground-up systems development for client capstone projects.
- Aided in creation of a kiosk web app using .NET MVC Framework that is used as a library attendance system, allowing the user to verify themselves by scanning a QR code containing their system identification key, hosted locally on the university's own network.
- Created a simple CMS web application using .NET MVC Framework, allowing visitors to view articles created by the system administrator using a content editor that allows the user to freely place elements and customize the site's contents to their liking.

EDUCATION

BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY

Polytechnic University of the Philippines – San Pedro Campus

October 2023

City of San Pedro, Laguna – Batch Hiraya, 2023

PROFESSIONAL SKILLS

- Experience in full-stack systems development, both ground-up and maintenance
- Experience in development of web applications using C# / .NET Core / .NET MVC Framework
- Familiar with the concept of object-oriented programming (OOP)
- Familiar with the concept of MVC (Model-View-Controller) system architecture
- Microservice system architecture systems planning and development
- Experience in developing web apps using React and Svelte
